

DLM5001—Drum Lifter

The **DLM5001 Drum Lifter** is designed to automatically clamp a standard 205 litre steel drum and safely place it without the operator leaving the driver's seat. The drum is gripped by pushing the arms against the drum centre and driving the forklift forward. When raised, the engaged arms will lock under the rolling hoop. The heavier the load, the tighter the grip becomes. To release, simply lower the drum to the ground and reverse the forklift.

Specifications:

WLL	500kg
Load Centre	1340mm
Weight	65kg
Fork Pocket Size	185 x 65mm
Fork Pocket Centres	300mm
