

SLR02701—Electric Lift Table 4,000kg

When the weight comes on, these stationary tables are built for the task. Heavy duty fabrication and design, 24V hand control and 3 phase power supply gives the lift table the grunt for commercial applications. Equipped with multiple safety features the lift tables facilitate handling and lifting up to 4000kg. A great machine for building equipment on and dock lifters, and is perfect for use around machining centres. Each table is fitted with safety stop bars around the bottom of the Tables. If disturbed they stop all table movement. Can also be fitted with safety skirts.

Specifications:

Product Code	SLR02701
Safe Working Load	4,000kg
Table Size	1200 x 2000
Min Table Height	240mm
Max Table Height	1100mm
Lifting Time	30 – 40 seconds
Base Frame Size	1600 x 900
