

BD201 - Lifting Trolley

The MHSBD201 is a great tool for lifting and holding items for fixing them in place. It can be fitted with a range of attachments including, forks, cradle & a hook. Due to the design the cradle lifts the highest at 3.95m. The hook is the lowest at 3.74m high. It's great for lifting roller doors, air conditioners or anything you can put a sling on. It has an adjustable wheel base to allow it to travel through door ways then expand so you can raise your item to the desired height. The mast is all aluminium which keeps the weight of the machine easily manageable by just one person, and can be transported to site on a ute or van.
