

## Forklift Safety Cages

These are the most common forklift work cages. Each has its own advantages to help in most situations.

By far the most popular cage is the **MHSFWP-2501**. It's supplied as a flatpack and is simply bolted together. Like all our work cages the door is an inward swinging self closing type. The cage is secured to the forklift with 2 pins. It has 2 safety harness points and a tool tray included. It's finished in a durable zinc coating so it will last for years.

### Specifications:

WLL	: 250kg
Load Centre	: 600mm
Unit Weight	: 110kg
Fork Pocket Size	: 160 x 60mm
Fork Pocket Centres	: 640mm

The **MHSWP-MS01** is exactly the same as the one above except this one has 50x50 mesh in the walls and door. The mesh can help to keep items inside the work platform if they get dropped etc.

### Specifications:

WLL	: 250kg
Load Centre	: 600mm
Unit Weight	: 122kg
Fork Pocket Size	: 160 x 60mm
Fork Pocket Centres	: 640mm

The **MHSWP-GC01**. This work platform is fully welded. It's Australian made and comes with two floor mounted safety harness points and is fully galvanised for a very long life.

**Specifications:**

- WLL : 250kg
- Load Centre : 600mm
- Unit Weight : 135kg
- Fork Pocket Size : 160 x 65mm
- Fork Pocket Centres : 640mm

The **MHSFWP-25C01** This cage is a collapsible design so when it's not in use it can be collapsed and stored in a small space. Again this cage is supplied with the two harness points and the removable tool tray as well

**Specifications:**

- WLL : 250kg
- Load Centre : 600mm
- Unit Weight : 122kg
- Fork Pocket Size : 160 x 60mm
- Fork Pocket Centres : 640mm

## Forklift Safety Cages

The **MHSTSWPF01** cage is another collapsible type. This makes it very easy to store and quick to assemble. The finish is painted yellow.

**Dimensions:**

Unit Weight :120kg  
Width : 1200mm  
Length : 1200mm
