

## HBEW201 - Nesting Trolley with Basket

### Nesting Trolleys Offer Efficient Material Handling:

The wire mesh platform trolley is designed for functionality and space optimization. These robust trolleys cater to various applications, making them a valuable asset for warehouses, retail stores, and industrial settings.

### Key Features:

- **Space-Saving Design:** The trolleys cleverly nest together when not in use, minimizing storage footprint and maximizing efficiency.
  - **Optional Top Basket:** A deployable top basket provides additional storage capacity when needed, offering increased versatility for specific tasks.
  - **Durable Construction:** A zinc plating on all metal surfaces ensures longevity and resistance to corrosion, ideal for demanding environments.
  - **Manoeuvrability:** Fitted with 125mm swivel castors, these trolleys offer smooth handling and easy manoeuvring in tight spaces.
- Impressive Load Capacity:** Capable of handling loads up to 200kg, these trolleys are suitable for transporting a wide range of items.

### Applications:

- **Order Picking:** The efficient design streamlines order picking processes, allowing for quick retrieval and movement of goods.
  - **Stock Trolley:** Ideal for transporting and organizing stock within warehouses or retail stores.
- Shopping Trolley:** These trolleys can be readily adapted for use in retail environments, providing a sturdy and dependable shopping cart solution.
