

## CSB - Spreader Beams

Ensuring safe and efficient overhead crane operations is paramount in any industrial setting. The CSB Spreader Beam offers a versatile solution to meet the demands of diverse lifting applications.

### Versatility

The Spreader Beams are available in a range of capacities and lengths. This allows for optimal selection based on the specific requirements of your lifting task. Whether you're handling light machinery or bulky materials, a CSB Spreader Beam can be configured to match your needs.

Each CSB Spreader Beam comes equipped with several features that promote safety:

- **Five Lifting Positions:** The beam offers five standard lifting positions, providing flexibility in adjusting the lifting point to suit the load.
- **Safety Swivel Hooks:** Two safety swivel hooks are included, ensuring proper load orientation and minimising the risk of entanglement.

### Durable Finish:

All CSB Spreader Beams boast a tough enamel paint finish. This coating safeguards the beam from wear and tear, promoting long-lasting performance.

### Specifications:

Model	Working Load Limit (kg)	Spread Range (mm)	Unit Weight (kg)
CSB2X1	2000	160 - 950	31
CSB2X2	2000	590 - 2000	70
CSB3X3	3000	710 - 3000	110
CSB5X4	5000	1140 - 4000	300
CSB10X4	10000	1130 - 4000	480
CSB10X7	10000	1730 - 7000	1350
