

Victory Swift Vacuum Lifter

Pick-And-Place Applications With The VICTORY SWIFT Vacuum Lifter

The SWIFT is designed to streamline handling many different types of products within manufacturing and logistics environments. This ergonomic and versatile machine is ideally suited for pick-and-place scenarios, making repetitive lifting tasks effortless. It can be fitted with different gripper attachments, including the two pad carton gripper, a sack gripper or the hook attachment.

It's beauty is in it's single handed operation. The ergonomic handle has a trigger for your index finger to squeeze to adjust the amount of vacuum in the system. This controls the lift height & speed of the vacuum lifter. It can be fitted to an existing crane or we can supply one to suit your needs. Available in two capacities, up to 35kg & 50kg.

Two pad gripper suited to lifting cartons

Round Gripper for lifting drums

Hook Gripper for lifting drums with handles

Oval gripper for lifting bags
